Inclusive by default. Address the public broadly while making intergenerational justice a policy priority.

Image direction

Real European streets, infrastructure and public spaces; direct flash or high-contrast documentary photography; subtle scan lines, grids and signal overlays. Avoid anonymous hooded figures, weapons, dystopian destruction and generic “hacker” clichés.

Founding manifesto

Europe must evolve.

Europe was designed for another era. Decisions affecting millions are too often distant, slow and difficult to understand. Meanwhile, the cost of living rises, housing becomes unreachable, technology concentrates power and confidence in democracy weakens.

The Alliance of Rebels Europe exists to challenge this stagnation.

For us, rebellion is not destruction. It is the courage to reject what no longer works—and the discipline to construct something better through peaceful, democratic action.

OUR PURPOSE

Redesign Europe so democratic power, prosperity and technological progress serve people.

01

Democracy people can control

Public decisions must be transparent, understandable and accountable. People need meaningful ways to participate between elections.

02

A dignified life for everyone

Housing, healthcare, education, food, energy and mobility must remain accessible. Economic progress means little when ordinary life becomes unaffordable.

03

Government without hidden influence

Political funding, lobbying and public contracts must be radically transparent. Corruption and conflicts of interest require real consequences.

Ten commitments

A democratic reconstruction agenda.

04**A fair economy**

Work should provide dignity, security and fair compensation. Tax systems should reward productive contribution while preventing extreme concentrations of power and wealth.

05**Housing is a foundation**

Europe needs more affordable homes, stronger protection against exploitation and policies that discourage keeping residential property empty for speculation.

06**Technology under democratic control**

Artificial intelligence and digital platforms must serve human freedom. People should control their data, understand automated decisions and benefit from effective public digital infrastructure.

07**Education for a changing world**

Education must remain accessible throughout life. It should cultivate creativity, practical capability, critical thinking and democratic understanding.

08**Climate action that improves daily life**

The ecological transition must produce cleaner cities, reliable transport, resilient energy and skilled employment, with costs and benefits distributed fairly.

Ten commitments

Freedom, cooperation and responsibility to the future.

09

A Europe that protects freedom

Europe must defend human dignity, civil liberties, equality before the law and the right to disagree peacefully. Security cannot become an excuse for permanent surveillance.

10

Responsibility to the future

Political decisions must account for long-term effects on public debt, climate, infrastructure, technology and social stability. Future generations deserve representation in choices they will inherit.

Our method

We will organize peacefully, participate democratically, publish evidence for our proposals and measure their results. We will revise policies that fail and remain transparent about uncertainty.

CLOSING DECLARATION

WE ARE NOT REBELLING AGAINST EUROPE. WE ARE REBELLING FOR THE EUROPE THAT HAS NOT YET BEEN BUILT.

Publication note

This founding draft is designed as a public discussion document. Before formal publication, policy commitments should be reviewed against the laws and electoral requirements of each country in which AORB intends to organize.
