ALLIANCE OF REBELS EUROPE

FOUNDING MANIFESTO

**A democratic political movement for the
generation that will inherit what comes next.**

Rebellion is the courage to reject what no longer works - and the discipline to
construct something better.

Europe must evolve.

Europe was designed for another era. Decisions affecting millions are too often distant, slow and difficult to understand. Meanwhile, the cost of living rises, housing becomes unreachable, technology concentrates power and confidence in democracy weakens.

The Alliance of Rebels Europe exists to challenge this stagnation through peaceful democratic participation, public experimentation and measurable reform.

OUR PURPOSE

Redesign Europe so democratic power, prosperity and technological progress serve people.

OUR POSITION

We are not rebelling against Europe. We are rebelling for the Europe that has not yet been built.

Our rebellion is constructive: fearless in ambition, democratic in method and accountable in practice.

The standards we hold ourselves to.

- **Human dignity**
Every person has equal worth. Politics must improve daily life without turning people into enemies or abstractions.
- **Democratic power**
Public authority must be understandable, accountable and open to meaningful participation between elections.
- **Freedom and pluralism**
Civil liberties, equality before the law and peaceful disagreement are foundations, not inconveniences.
- **Transparency**
Political funding, lobbying, evidence, public contracts and conflicts of interest must be visible to the public.
- **Intergenerational justice**
Decisions must account for the debt, climate, infrastructure and institutions inherited by future generations.
- **Evidence and revision**
We will publish assumptions, measure outcomes and change policies that do not work.

A democratic reconstruction agenda.

01 Democracy people can control

Public decisions must be transparent, understandable and accountable. People need meaningful ways to participate between elections.

02 A dignified life for everyone

Housing, healthcare, education, food, energy and mobility must remain accessible. Progress means little when ordinary life becomes unaffordable.

03 Government without hidden influence

Political funding, lobbying and public contracts must be radically transparent. Corruption and conflicts of interest require real consequences.

04 A fair economy

Work should provide dignity, security and fair compensation. Economic rules should reward productive contribution and prevent extreme concentrations of power.

05 Housing is a foundation

Europe needs more affordable homes, stronger protection against exploitation and policies that discourage residential property being held empty for speculation.

Freedom, capability and responsibility.

06 Technology under democratic control

AI and digital platforms must serve human freedom. People should control their data, understand automated decisions and benefit from effective public digital infrastructure.

07 Education for a changing world

Education must remain accessible throughout life. It should cultivate creativity, practical capability, critical thinking and democratic understanding.

08 Climate action that improves daily life

The ecological transition must produce cleaner cities, reliable transport, resilient energy and skilled employment, with costs and benefits distributed fairly.

09 A Europe that protects freedom

Europe must defend human dignity, civil liberties, equality before the law and the right to disagree peacefully. Security cannot excuse permanent surveillance.

10 Responsibility to the future

Political decisions must account for long-term effects on public debt, climate, infrastructure, technology and social stability.

Rebellion with a democratic method.

AORB will organize peacefully, participate democratically, publish the evidence behind its proposals and measure their results.

01

Participate

Shape proposals through peaceful democratic action.

02

Publish

Share evidence, assumptions and funding openly.

03

Measure

Track outcomes with clear public data.

04

Revise

Change what fails. Improve what works.

DEMOCRATIC SAFEGUARDS

We reject political violence, hate, dehumanization, corruption and authoritarian rule. We defend pluralism, peaceful opposition, independent institutions, honest elections, equal protection under the law and transparent public finance.

Power must always remain accountable to the people it serves.

Build the Europe that does not yet exist.

We begin with a simple conviction: Europe can be more democratic, more just and more capable of protecting the future.

We invite people across Europe to question inherited systems, propose credible alternatives and take part in peaceful democratic reconstruction. The movement will be judged by the clarity of its commitments, the integrity of its conduct and the results it delivers.

OUR FOUNDING COMMITMENT

We will be fearless about what must change, disciplined about what we propose and democratic in how we act.
